

VALCam Professional Series

The **NEW VALCam Professional** series is specifically designed to capture the highest quality images for transfer to ID badge cards as quickly and efficiently as possible. No longer will lengthy video capture times slow you down. We know where the bottlenecks are and have tackled those problems head on.

Are you tired of manually framing your subject? With the **VALCam Professional Series** you have mouse control of pan, tilt, and zoom. Have you accepted poor quality images as par for the course? The **VALCam Professional Series** provides the highest quality captures available.

Features

- High quality Pan/Tilt/Zoom or Zoom camera. (>467 lines), VideoVue PCI card, software, cables, and mounting hardware (Tripod available)
- Mouse control of Pan/Tilt/Zoom (ValCAM ID) or Zoom (VALCam Zoom)
- Includes synchronized Flash or Strobe Lamp with software exposure control
- Same system works on both Desktop and Laptop (PCMCIA card available)
- Twain driver for instant integration with all major ID and graphic packages
- New design streamlines cable connections by using a single camera cable
- Software developer's kits for custom applications available on request
- One-year parts and labor with unlimited technical support.

Our innovative strobe lighting and flash options guarantee high quality images in any situation, even dark rooms. The **VALCam Professional Series** offers a complete solution including camera, PCI or PCMCIA capture card, strobe light or flash, software drivers, and mounting hardware. An optional tripod is available.

For laptop users we offer a stand-alone or upgrade kit that provides the same features as the desktop version. Would you like to customize the **VALCam** software to work with your software package? We make it easy with our Software Developer's Kit.
